General Comment

Our Country is clearly sicker than ever and multiple countries have banned the use and sale of glyphosate due to the numerous studies that have proven its link to human health issues. It is time to put human health and lives in front of profit margin gains and chemical companies. There is no logic behind or reason that chemicals should have to be proven unsafe before they are banned. We must have a no tolerance policy to prove that chemicals are safe before they are ever approved. Please put our health first!! Thank you.
